

- **Send an MMS picture with your handwritten signature ([www.realeyes3D.com](http://www.realeyes3D.com)):**

The mobile phone has come a long way but the camera on the phone has not been fully exploited. Realeyes3D, a start-up based in France, has a solution called Phone2Fun Digitiser that allows camera mobile phone users to send handwritten messages with drawings or pre-printed information, such as newspaper ads or portions of printed pages, using their mobile phone like a scanner.
